

- May 1-53 Hawk cat. over the meadow
- May 2-54 more chatters in detour
- May 21-54 best lake green legs & no green
- May 9-54 Hawk cat. & the lake less water greater than
- May 7-55 lake green in water
- May 8-55 red. leg birds built & muddled.
- May 29-53 light green grass, 1st night on the land meadow.
- May 12-55 Hawk cat. 1st time birds muddled
- May 4-55 red. leg birds just beg. & then themselves
- May 22-56 some hollibone leaves started.
- May 1-55 water in winter - yellow swigons in green
- May 25-60 cold green grass from the swamp
- May 14-58 nest flaps just out of h. mud spread.

Green for tent & foliage } & many tables
 dirt, dirt & water

- Leaves etc. of water with young white 50 May 7-54
- May 30-60 some just yard grass mowed
- low tunnel & pasture May 7-54
- can group into May 1 & 15

- May 9-52 close water
- May 9-52 show darkness with 1 sunrise
- May 16-54 Pond beg. of green or meadow leg (20-52)
- white hair fern meadow May 30-52 - 26-53

- May 1-53 large fern 1 first high
- May 7-53 a few leg birds spread out in view.
- " " Red cat. over 1. first high (muddled)
- May 12-53 Hollibone nest found later. 2 first high
- 14 " for hollibone hollibone in nesting of water water
- 20 " no water - 1.5 leaves
- 26 some ferns in low wood in water paper state

- May 5-54 Hawk cat. & the lake leaves more greater than of my legs yet
- " " some 10 x 9 water width
- " " Hollibone nest with water head.
- " " Green leaves of all birds. Lately hollibone see, now make
- " " in or less than
- 7-53 2 leaves hollibone nest found later.
- 21- Rain water rapidly picking up
- 25-54 Ferns (muddled) beg. light 2 water with allowed green

- May 25-55 still of green, red, & river.
- 7- " nest flaps show themselves about the 4' wide head.
- 28 " Leaves of Kalmia in flower
- June 4-55 Egg of hollibone started 1.2 hollibone
- 5 " hollibone green hollibone from there on meadow

- May 17-56 *Turritella striata* 2 1/2 feet high
 May 10-58 *C. striata* edge of w.p.
 12 " some early bushes 1 foot high - 5-59 5-60 high
 May 6-60 *Phlox* 1 foot high - 11-59 11-60 11-61
 even more unempted ferns 2 feet high
 13 Great green wood newly all over
 16 - Red leaves of *S. angustata* 2 ft. 75. *Althaea* ^{white}
 May 8-59 *Phlox* 1 foot high - *Althaea* ^{white}
 May 26-57 *Phlox* 1 foot high - *Althaea* ^{white}

 12 " *Phlox* 1 foot high - *Althaea* ^{white}
 16 " *Phlox* 1 foot high - *Althaea* ^{white}
 22-58 *Phlox* 1 foot high - *Althaea* ^{white}
 May 11-54 *Phlox* 1 foot high - *Althaea* ^{white}
 21 " *Phlox* 1 foot high - *Althaea* ^{white}
 Mar. 30-56 *Phlox* 1 foot high - *Althaea* ^{white}
 Apr. 2-56 *Phlox* 1 foot high - *Althaea* ^{white}

May 12 - 55 - interesting: found a green of just flowering
stage - think you can see this - others
showing (last were red) (1)

White pine about 2 inches 18-53 18-54 - 19-60

P. pine about 2 inches only 17" or so by before last

Then look back with it June 6-53 - June 4-54 - 11-59 - May 7-60

Fire hazard May 26-54 - 28-53 in the way -

Black c. roots 1 in the way May 19-53

Red c. roots some May 28-54 18 in with 4 feet high.

History books much enlarged May 10-54

White wood stands next to it May 52

White Birch 12-53 rapidly becoming green 11-54 and has made a vein of the
green - 13-60 looks green now most noticeable

Plum in case of big when 2 more of green along river May 19-54
11-60 - both look generally then as growth 2 and 11 -

Aspen with all started to 10" - 15" of June 60

S. nigra fairly good with leaf May 23-60

June 1-60 - ^{lighter} much ^{lighter} green with ground - but is generally dead looking at all
dist. June 15-60 is fairly good

Cherry, some for black June 1st 54

June 18 '59 Swamp White O. - red maple - willow & (8)
 beg. to show a slight vibrancy

- June 3rd 60 Decid. foliage still rather yellow green than green
 4 Tobacco stems comparatively dense heavy about,
 4 most maple - birch - willow - alder & other leaves
 pretty abundant - ~~the black of the birch leaves~~
 but most oak - birch - dark not quite
 deeply across fairly commoned leaves are most true brown
 fully abundant leaves - the black of the birch leaves green.
 (in better of the way 31 & 29 53.!)
 6 The new oak & maple leaves very fair but white
 can only see through oak, & low as yet
 7 Late small poplar - pretty low, with buds
 about 1/2 in the way there & - many maple birch &
 but lately leafy there
P. grandidentata this day.
 8 Red O. leaves long larger than at any point.
 leaves generally about fully 4 rounded
 11 Englemans fully in view, & get the back of a
 yellow dark green & somewhat
 21 - first white thing full of dark shade at distance
 22 leaves rapidly becoming hard & glaucous
 24 - very all plants, except of most of them & summer
 commenced.
 26 New look to woods for birds - too dark.
 28 Starts black with ~~dark~~ the landscape this 25th
 30 Foliage of decid. trees ready to dark & engreen

At. 1-52 Permal. color of decid. wood most - a little
 more red - gray at the bottom (from the color of the
 with leaves & branches)

28-52 No indistinct change in color of wood when seen
 any longer - looks color the maple. Perhaps some things are
 willow bright & some like some willow & some alder -
 maple dark & poplar with fair green - others more
 of a part.

May 1-53 The O. leaves on the plain are fallen
 with ~~the~~ heavy buds just ready to open
 before or 1/2 in the way, with some alder
 6 S. alba some ~~in~~ ~~the~~ ~~way~~ ~~of~~ ~~the~~ ~~leaves~~ ~~are~~ ~~fallen~~ ~~on~~ ~~the~~ ~~plain~~ ~~on~~ ~~the~~ ~~22-55~~
 but large complex than 50 both heavy and defined & ~~the~~ ~~defined~~
 - but large complex than 50 both heavy and defined & ~~the~~ ~~defined~~
